SUMMARY

Senior Frontend Engineer with 6+ years shipping React, Next.js, and Tailwind CSS products for global enterprises and high-growth teams. Comfortable moving fast on customer-facing surfaces — from zero-to-one mobile apps to agentic AI platforms — with measurable gains in performance, engagement, and workflow efficiency. Thrives in cross-functional environments where speed, product quality, and design rigor matter equally.

SKILLS

Frontend: React, Next.js, React Native, TypeScript, JavaScript, Tailwind CSS, CSS3, HTML5, GSAP

Backend & Platform: Node.js, Python, Java, AWS, Azure

AI: LLM integration, RAG pipelines, NLP, agentic interfaces

WORK EXPERIENCE

Ernst & Young — Remote11/2023 – Present

Senior Frontend Engineer

- Architected a **Next.js** and React Query–powered UI integrated with Python microservices on Azure, improving data retrieval performance by 40%.
- Lead frontend engineering for EY’s enterprise AI platform: a chat-based, agentic LLM environment enabling global clients to perform automated risk analysis, report generation, and decision support.
- Designed a secure, multi-tenant frontend architecture with role-based access control used by enterprise customers across the EY ecosystem.

Shop-Ware — Remote06/2022 – 10/2023

React Native Engineer

- Shipped Shop-Ware’s customer-facing React Native mobile app from zero to one, later contributing to a successful product acquisition.
- Introduced performance improvements that cut app load times by 20% across iOS and Android, tightening the feedback loop for daily end users.
- Led collaboration across design, backend, and QA; established CI/CD pipelines and automated release processes to ship faster with fewer regressions.

Nuvalence — Remote11/2021 – 06/2022

Software Engineer

- Delivered the frontend architecture for Ford’s Connected Vehicle platform using React and Redux backed by Java microservices, improving user flows and page performance by 30%.
- Led development of a NYC Government web system on Java Spring Boot, modernizing critical workflows and reducing manual processing by 40%.
- Ran code reviews and introduced engineering best practices that lifted maintainability and team throughput.

Mitel — Kanata, ON11/2018 – 10/2021

UI/UX Software Developer

- Modernized the UI/UX of Mitel’s communication suite with React Native and Angular, lifting user engagement by 40%.
- Built a reusable component library that cut duplicated frontend code by 25% and standardized patterns across desktop, web, and mobile.
- Partnered closely with design, product, and QA to deliver consistent experiences across platforms.

EDUCATION

Centennial College, Toronto Associate in Applied Science (A.A.S.), Software Engineering — 06/2018
