SUMMARY

Senior frontend engineer with 7+ years building production interfaces for global enterprises and zero-to-one product teams. Architected a multi-tenant agentic AI platform at Ernst & Young, shipped a React Native product through to acquisition, and delivered connected-vehicle frontend architecture for Ford. Deep in React, Next.js and TypeScript, fluent across Node, Python and cloud infrastructure, with a record of measurable gains in performance, engagement and delivery speed.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Python, Java, SQL, GLSL

Frontend: React, Next.js, React Native, Redux, React Query, Tailwind CSS, GSAP, Three.js, Storybook, Vite

Backend & Data: Node.js, REST APIs, GraphQL, Java Spring Boot, PostgreSQL, Supabase, Microservices

Cloud & DevOps: Azure, AWS (S3, Lambda, CloudFront), Docker, CI/CD (GitHub Actions), Vercel, Git

AI Engineering: LLM integration, Agentic interfaces, RAG pipelines, Prompt engineering, Evaluation harnesses

Quality & Practice: Jest, React Testing Library, Cypress, Accessibility (WCAG), Design systems, Agile / Scrum, Mentorship

PROFESSIONAL EXPERIENCE

Ernst & Young — Remote · Toronto, Canada

11/2023 – Present

Senior Frontend Engineer

- Architected the multi-tenant Next.js and React Query interface over Python microservices on Azure, improving data-retrieval performance by 40%.
- Designed role-based access control across tenant hierarchies, isolating client data for enterprise customers across the EY ecosystem.
- Integrated LLM-driven chat and tool-calling workflows into production, taking features from prototype to release with product, design and platform partners.
- Set frontend architecture standards and led code review across the team.

Shop-Ware — Remote

06/2022 – 10/2023

React Native Engineer

- Shipped the React Native application from zero to one across iOS and Android as the sole mobile engineer; the product contributed to a successful acquisition.
- Cut application load times by 20% on both platforms, tightening the daily feedback loop for end users.
- Established CI/CD pipelines and automated release processes, shipping more often with fewer regressions.

Nuvalence — Remote

11/2021 – 06/2022

Software Engineer

- Delivered the frontend architecture for Ford's Connected Vehicle platform using React and Redux over Java microservices, improving user flows and page performance by 30%.
- Led development of a New York City government web system on Java Spring Boot, modernising critical workflows and reducing manual processing by 40%.

Mitel — Kanata, Ontario, Canada

11/2018 – 10/2021

UI/UX Software Developer

- Modernised the interface of Mitel's communication suite with React Native and Angular, lifting user engagement by 40%.
- Built a reusable component library adopted across all three platforms, cutting duplicated frontend code by 25% and standardising interaction patterns.

SELECTED PROJECTS

Seventeen Studios — rutvik17.github.io/seventeen-studios

2026 – Present

Founder & Principal Engineer

- Founded an independent engineering studio for product, creative and applied-AI engineering. Built the platform end to end: static Next.js export, custom GLSL and Three.js rendering, GSAP choreography, automated GitHub Actions deployment.

EDUCATION

Centennial College — Toronto, Canada

06/2018

Associate in Applied Science (A.A.S.), Software Engineering
